Sequence 15, Application US/09073465
; Patent No. 6054278
; GENERAL INFORMATION:
; APPLICANT: DONGE, Deborah B
; APPLICANT: SMITH, DOUG
; TITLE OF INVENTION: INBENTIFICATION
; TITLE OF INVENTION: INSENTIFICATION
; TITLE NUMBER OF 1343 US
; CURRENT APPLICATION NUMBER: US/09/073,465
; CURRENT PILING DATE: 1998-05-05
; NUMBER OF SEQ ID NOS: 17
; SOFTWARE: Patentin Ver. 2.1
; SEQ ID NO 15
; Sequence 14, Application US/09073465
; Patent No. 6054278
; GENERAL INFORMATION:
; APPLICANT: DODGE, Deborah B
; TITLE OF INVENTION: RIBOSOMAL RNA GENE POLYMORPHISM BASED MICROORGANISM
; TITLE OF INVENTION: IDENTIFICATION
; FILE REFERENCE: 4343 US
; CURRENT APPLICATION NUMBER: US/09/073,465
; CURRENT FILING DATE: 1998-05-05
; NUMBER OF SEQ ID NOS: 17

Patent No. 6380369

GENERAL INFORMATION:

APPLICANT: Adams et al.

TILE OF INVENTION: Human DNA Mismatch Repair Froteins
FILE REFERENCE: PF106P2

CURRENT FILING DATE: 1994-08-23

PRIOR FILING DATE: 1994-08-23

PRIOR PLICATION NUMBER: 08/210,143

PRIOR FILING DATE: 1994-01-6

PRIOR PLICATION NUMBER: 08/197,757

PRIOR FILING DATE: 1994-01-27

NUMBER OF SEQ ID NOS: 78

SOFTWARE: PatentIn version 3.0

SEQ ID NO 66

LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Parent No. 6380369;

Patent No. 6514694
GENERAL INFORMATION:
APPLICANT: Milhausen, Michael James
APPLICANT: Milhausen, Michael James
TITLE OF INVENTION: TOXOFLASMA GONDII PROTEINS, NUCLEIC ACID MOLECULES, AND USES THER
FILE REPERENCE: TX-1-C2
CURRENT APPLICATION NUMBER: US/09/216,393B
CURRENT PILING DATE: 1999-12-18
PRIOR FILING DATE: 1997-12-19
NUMBER OF SEQ ID NOS: 366
SOFTWARE: Patentin version 3.1
SEQ ID NO 243
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        APPLICANT: Susan M. Fraier

Patent No. 6716627

GENERAL INFORMATION:
APPLICANT: Kenneth W. Dobie
APPLICANT: Susan J. Myers
TITLE OF INVENTION: ANTISENSE MODULATION OF MUCIN 1, TRANSMEMBRANE EXPRESSION
TITLE OF INVENTION: ANTISENSE MODULATION OF MUCIN 1, TRANSMEMBRANE EXPRESSION
CURRENT APPLICATION NUMBER: US/10/029,517
CURRENT FILING DATE: 2001-12-20
SEQ ID NO 76
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                             Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps

; Sequence 52, Application US/08432871C
; Patent No. 5877010
; GENERAL INFORMATION:
APPLICANT: Loeb, Lawrence A.
APPLICANT: Black, Margaret E.
TITLE OF INVENTION: THYMIDINE KINASE MUTANTS
NUMBER OF SEQUENCES: 104
CORRESPONDENCE ADDRESS:
ADDRESSEE: Seed and Berry LLP
STREET: 6300 Columbia Center, 701 Fifth Avenue
CITY: Seattle
STATE: Washington
SOFTWARE: Patentin Release #1.0, Version #1.25
                  CURRENT APPLICATION DATA:
APPLICATION NUMBER:
PULING DATE: 19920110
CLASSIFICATION NUMBER:
PTILING DATE: 19920110
CLASSIFICATION: 435

Patent No. 5646042

GENERALI INFORMATION:

APPLICANT: Stinchcomb, Dan T.

APPLICANT: Stinchcomb, Dan T.

APPLICANT: Braper, Kenneth

APPLICANT: Brayer, Kenneth

APPLICANT: Jarvis, Thale

TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND

TITLE OF INVENTION: CANCER USING RIBOZYMES

NUMBER OF SEQUENCES: 2627

CORRESPONDENCE ADDRESS:

ADDRESSEE: Lyon & Lyon

STREET: 633 West Fifth Street

STREET: 631 West Fifth Street
